

BUSINESS PROGRAMS

Degrees in business include majors such as business administration, accounting, finance, management, marketing/sales, human resources, sports management, manufacturing/supply chain management, and entrepreneurship. Students interested in transferring to a four-year college/university are encouraged to pursue an associate of science degree in order to prepare for upper-level coursework in their major. Certificates and Associate of Applied Science degrees are for students entering directly into a career field such as legal secretary or paralegal. Ocean County College encourages students to discuss their transfer and career goals with an advisor.
