

DISABILITY SERVICES

The Office of Disability Services works with students with disabilities to develop an Accommodation Plan ensuring equal access to programs, activities, and academics which minimize the impact of a disability in a learning environment. Students with documentation of a learning disability, medical/physical disability, visual or hearing impairment, and/or psychological/psychiatric disability must arrange disability services through the Office of Disability Services. To arrange for services, a student must:

1. Place an initial request for accommodations through the secure online portal: go.ocean.edu/intake
2. Submit written documentation of disability
3. Meet with a staff member from the Office of Disability Services
